Ques 1: Create a container for the below bash script(**prime.sh**).
1. Create a Dockerfile

```
FROM ubuntu
COPY prime.sh .
RUN chmod +x prime.sh
CMD ["sh","prime.sh"]

~
```

2. Create a Docker Image

```
root@ip-172-31-34-142:/home/ubuntu/Docker_Assignment/Docker_Bash# ls
Dockerfile  prime.sh
root@ip-172-31-34-142:/home/ubuntu/Docker_Assignment/Docker_Bash# docker images
REPOSITORY    TAG       IMAGE ID        CREATED         SIZE
prime         latest    476dd45ecac2    3 minutes ago   77.8MB
ubuntu        latest    58db3edaf2be    7 days ago      77.8MB
root@ip-172-31-34-142:/home/ubuntu/Docker_Assignment/Docker_Bash#
```

```
root@ip-172-31-34-142:/home/ubuntu/Docker_Assignment/Docker_Bash# docker images
REPOSITORY    TAG       IMAGE ID        CREATED         SIZE
prime         latest    476dd45ecac2    23 seconds ago  77.8MB
ubuntu        latest    58db3edaf2be    7 days ago      77.8MB
root@ip-172-31-34-142:/home/ubuntu/Docker_Assignment/Docker_Bash# docker run -it prime
Enter Any Number: 11
Prime
root@ip-172-31-34-142:/home/ubuntu/Docker_Assignment/Docker_Bash#
```

Find the script from here https://github.com/DARK-art108/Bash-Scripts
